Work experience

2016-

Final project

I'm working on a final project in cooperation with LS Retail. The project is about making a real-time monitoring for petrol stations. We get data from an MS SQL database and a sync service, then we design a RESTful web API in .NET which fetches the data and processes it. We make a front-end in AngularJS which allows the user to monitor the health status of the station in real time.

2014-2015

Centris - RU Internship

Went twice to the course RU Internship, where I worked with a group of people on developing an intranet for the University. I worked both on the front-end and the back-end. The front-end is written in AngularJS and the back-end in .NET

2013-2014

All Around

Worked on a marketing site about Iceland, which has not been deployed due to marketing reasons.

Education

2013-2016

University of Reykjavík

BSc in Computer science

2008-2012

Commercial college of Iceland

Business, Economy

Skills and achievements

Athlete Committee (Icelandic sportfederation)

I'm in a committee along with five other athletes which was created in June 2015. The committees job is to discuss and work on the welfare for Iceland's top athletes. The committee will have a member in the Icelandic sportfederation.

Competitors representative

Was chosen as a competitors representative in 2014 by the Icelandic Dancesportfederation.

Web services

I know how to create, build and structure REST web services in NodeJS and in ASP .NET.

Qualifications

Android (Java)

C#

C++

CSS

HTML

Java

JavaScript

SQL
